

One-day Workshop on Functional Behavioural Analysis and Its Application to Management of Behavioural Problems in ASD and ADHD Children

Functional Behavioral Analysis (FBA)

is a systematic assessment and intervention approach designed to gain deeper understanding of problematic behaviors. FBA can help to:

- develop more targeted intervention strategies to **reduce or eliminate behavioral issue**
- provide **effective support and interventions**

FBA is significantly effective in addressing behaviors associated with special educational needs, including:

- ✓ Autism Spectrum Disorder (ASD)
- ✓ Attention Deficit Hyperactivity Disorder (ADHD)
